JFY-1141

JFY-1141 Graphite Yarn with Outside Braided Inconel Wire Jacket 外编茵苣镍丝网石墨线

It is made from flexible graphite yarn as basic material with outside braided Inconel wire jacket. Primarily as the high pressure pump and valve packing braided material. 以柔性石墨线为基础材料，利用高速金属丝编织设备，在石墨线的外表面均匀包裹一层茵苣镍丝金属丝网。主要作为高温高压泵阀类盘根编织线使用。

JFY-1131 Graphite Yarn with Outside Braided SS304 Wire Jacket 外编SS304网石墨线

SS304 and other metal alloy wire also can be supplied on customers' demand. SS304外编石墨线以及其他合金金属丝外编石墨线，也可依照客户要求提供。

PACKAGE 包装:

In coils of 5kg, 10kg, other packages on request. Supply OEM products. 5公斤/卷，10公斤/卷。其他包装依照客户要求。

JFY-1142

JFY-1142 Graphite Yarn with Outside Crocheted Inconel Wire Jacket 外钩编茵苣镍丝网石墨线

Made from flexible graphite yarn as basic material with outside crocheted Inconel jacket; compared with graphite yarn with Inconel wire outside braided jacket, JFY-1142 is an epochal product most recently researched and developed. It uses crocheted structure and has characteristics of high resistance to tension stress. 单根茵苣镍丝外钩针编织网质地均匀，对轴承的摩擦较传统外编金属丝网小，具有极高的抗拉强度。与外编茵苣镍丝石墨线相比较，采用外钩针编织茵苣镍丝网石墨线为原料编织盘根成品整形后金属丝网不易产生皱褶，翘起等，为高温高压泵阀类盘根编织线中最为理想的一种产品。

JFY-1132 Graphite Yarn with Outside Crocheted SS304 Wire Jacket 外钩编SS304网石墨线

SS304 and other metal alloy wire also can be supplied on customers' demand. 外钩编SS304石墨线以及其他合金金属丝外钩编石墨线，也可依照客户要求提供。

PACKAGE 包装:

In coils of 5kg, 10kg, other packages on request. Supply OEM products. 5公斤/卷，10公斤/卷。其他包装依照客户要求。
